Air Movers

3VAMS 7.31"

3VAM 7.31"

8VAM 14.37"

6VAM 11.25"

10VAM 17"

AirPro Air Movers use small volume of high velocity compressed air passing through a series of small holes creating a venturi action, causing large volumes of low pressure air to be moved. (Steam pressure may also be used as a power source). Because air movers have no moving parts they are suited for use in venting air, dust, smoke and fumes in hazardous areas.
